

# Elsa III vom Tecklenburger Land x Erik vom Gusseisen

## PUPPIES SPRING OF 2024

We are planning to mate Elsa III vom Tecklenburgerland (Emmy) to Erick vom Gusseisen (Bill). If biology is consistent pups would be born March 2024 and could go to their new homes in May. I was very fortunate to acquire Emmy. She comes from one of the oldest and most respected KIM kennels in Germany. The breed got his first KIM, as a teenager, in 1965 from Hermann Lons (Loens), who is credited with promoting and establishing the KIM breed. I have known her breeder for a number of years. Only because of unique special circumstances was I able to acquire her. KIM of this quality, who was fully trained and approved for breeding do not come up for sale very often and especially to buyers outside of Germany. I personally only know of 3. The breeder has been mother line breeding to refine his line for over 40 years. Emmy is a product of his dedicated work. It shows.

I WILL INTRODUCE YOU TO EMMY FIRST AND Bill WILL FOLLOW BELOW EMMY.

**Emmy** was born, May 23, 2021. To give you an idea of her temperament, trainability, stability and intelligence I am going to list how she performed in her JGHV field performance tests competed before she was 2 years old.

### **Emmy's Statistics:**

VDH/KIM#: 21-0887

Hellschimmel, Whelped: 05/23/2021, 53 cm

Hips: HD-A, HQ 0.96

Ureter (A)

Form/Coat Rating: V/SG

JGHV Testing & Awards:

**Btr** Award (9.5 months old) before JVP test. Description below

**VJP** 75 (10 months old) **AH** Award Description Below

**HZP** 186, LE 10 (15.5 months old)

**VGP** 335 Prize I (16.5 months old)

**Sight/scent** laut

Test Evaluation Sheets are available upon request.

### **ELSA JGHV PERFORMANCE AWARD DESCRIPTIONS:**

**Btr** COMPLETED 3/6/2022 She was 9 1/2 months. This was before she competed the VJP.

Description of **Btr** Award: *Bringtreueprüfung (Btr)*

**Retrieving Reliability Test:** During the Btr the dog demonstrates that it is a reliable retriever by finding, picking up and delivering to its handler any cold, dead game that was found accidentally, without any influence by the handler. This test is conducted in a forested area during the months of August through April. At least two hours before the test a cold, dead fox will be carried on a circuitous route to a designated place in the forest. Once the dog is released with a SEARCH command, the handler must remain completely

silent. The dog passes the test if it finds and retrieves the fox to its handler within 20 minutes of being released.

VJP (75) & AH Award COMPLETED 3/30/222 She was 10+ months old. At her VJP evaluation she received the AH award.

**Description of AH Award: Armbruster Halt Award:** The Armbruster Halt Award is granted when a dog demonstrates the ability to be obedient on the track of a hare during the VJP, HZP or VGP. The dog is whistled to the DOWN position when it sights a hare. After the hare is out of sight, the dog is released to track it and must demonstrate at least a GOOD track. The dog must demonstrate obedience on every hare it has seen during the test, and must be 20 m from its handler at least once.

### **Elsa III (Emmy) SHORT STORY:**

I traveled to Germany pick Emmy up Mid February of 2023. The owner was on vacation. He emailed me the commands he used when training her before I arrived in Germany and Heiko helped me overcome my American accent and pronounce the German commands correctly...so I sounded like a German, at least when using those commands.

The Breeder clued me in by telling me, "This is a dog that you will not stop and casually talk to your neighbor." He left it at that. I know him well enough I knew exactly what he was telling me. By the time I had worked with her the first time there was no question his description was correct!

YOU CAN VIEW EMMY IN THE VIDEOS UNDER THE TABS:

What is a Kleine Munsterlander

Who We Are

Since we have not owned Emmy through a hunting season in North America you will not see her in the field hunting wild game. However check our Facebook, Julson Kennel, and you will be able to see her working young pheasants. Being blessed to live in South Dakota and having access to exercise my KIM on private property provides this type of opportunity, occasionally.

**With the valuable input from Elsa III breeder we have selected the following male for this mating**

**Bill** was born, May 23, 2019. To give you an idea of his temperament, trainability, stability and intelligence please review how he performed in her JGHV field performance tests. These are very respectable scores. The important thing to realize is this is the owner first ever hunting dog. It is the first dog or animal of any type he has trained. I personally flew to New York where Eric (Bill) and his family live. We spent a day and a half in the field and in public with Bill. I wanted to access his temperament, drive, nose and just overall presence of Bill in public, home, field and water. I found him to be very cooperative and lots of drive and focus in the field and in the water. He obeyed me when I commanded him to heel, lay down and stay on place. I had been around him for ½ an hour and had not worked with him at all....this was a, "let's see what happen when the owner was setting up birds in the field." I was impressed.

I collected video of Bill in the field, water, tracking and in public places. I apologize but it will be the end of November before I am able to get that edited and up.

Watch my Facebook page, Julson Kennel, to see why it is going to take me this long! 😊

**Erik's Statistics:**

VDH# 19-0511
